MEDICATION RELEASE

For Middle and Upper School Students:

Should a student need to take medicine during the school day, the parent/guardian must send a doctor's order regarding dosage and time of administration. Prescription medications must be sent to school in their original containers and be clearly labeled by the pharmacist. No expired medications will be administered.

The parent/guardian is responsible for submitting doctor's orders to the School *each time* there is a change of medication, dosage, or time of administration. Under no circumstances may a School staff member administer a prescribed medication without a doctor's order. Tylenol, Motrin, and Benadryl may be given as a one-time dose, with oral or written permission from the parent/guardian.

Medication Authorizations are available from the Middle/Upper School Office.

Please indicate any/all items which when necessary, may be used for your child:
